

It's a dome of a home - How one beach house survived Hurricane Ivan

Nov. 14, 2004, By Sun Sentinel - Belinda Long

For years, Mark has wanted to have an accurate graphic portrayal of the dome structure explaining the advantages it provides. His wish came true when Belinda Long, a graphics reporter, called. The Sun Sentinel published her full page graphic explanation of the dome on Sunday, November 14, 2004. We were overwhelmed by the informative, concise, and accurate article Belinda produced. Her ability to compile information and illustrate with amazing graphics resulted in an article that is educational and easily understood.

Many thanks to Belinda Long for a terrific addition to the dome literature archives.
