

# HURRICANE MAN

Below is an excerpt of the "Hurricane Man's" web site. We thank him for including us in his information.

**<http://hurricane-man.com/>**

**On August 28th, 2005, late in the afternoon in Waveland, Mississippi, I became the Hurricane Man, a title conferred on me by a six-year-old boy who I overheard say to his mother, "What did the Hurricane Man say?"**

**He was nervous because his mother was, and she had good reason. Twelve hours out was the mother of all storms. Hurricane Katrina was bearing down on the western edge of Mississippi. Before it was all over, all was destroyed in Waveland and hundreds were dead, but a dozen Wavelanders thought of me as THE Hurricane Man. When I did, I launched this website and began to write with authority and conviction.**

**At first, I was very angry at the system and at the way coastal Americans deal with hurricanes. Much of that has been vented and deleted. What remains should be of great value to those who have good reason to be nervous about hurricanes.**

**Hurricane-Man.Com is a web based resource for anyone wishing to live in flood plains or areas of severe weather and does not wish to pick a fight with Mother Nature. You'll not find conventional wisdom being espoused here. In some cases, conventional wisdom and the wise by degree will be mocked here. The Native American and the fire ant will be lauded and applauded. Mother Nature, "Mom," has our respect and admiration. She certainly got our attention.**

**Hurricane Smart Links:**

- **The [Geodesic Dome](#) smart habitat for coastal living**
- **[Domeofahome.com](#) for a glimpse at the future of coastal living. Read some of the smartest and finest writing on the subject of monolithic concrete domes and hurricanes from**

people with actual real world experience, vets of Ivan, Dennis, and Katrina.
